ONLINE SAFETY

Parkside Junior School is committed to keeping children safe. Online safety is important to us and we teach the children how to stay safe when using their devices at home as well as at school.

We strongly advise parents to set up parental controls at home. Parental controls are software and tools that help parents to set controls for their children's computer use. They're a great way of helping to prevent children from accessing unsuitable content online. Controls can be placed on differing devices such as tablets, laptops, games machines and even mobile phones.

Controls aren't a single solution to staying safe online -talking to your children and encouraging responsible behaviour is critical - however, controls are a vital first step to helping to protect your child online.

There is guidance on our website on how to do this. Alternatively, Mr Dell will run workshops and set up controls for you.

Please complete the form below and return to the school office.

Kind regards

Paula Whysall

ONLINE SAFETY

Child's Name _____

I already have parental controls and monitor my child online.

I will ensure that parental controls are set up by September when my child starts Parkside

I will require some help setting up parental controls

I don't feel the need to set up parental controls at this stage as I always use devices with my child.
